January 29, 2010

You are receiving this email because you have previously expressed interest in the High Lift Prediction Workshop, either by registering on the website or sending in a direct email.

Please note the following updates to the schedule:

   - Abstracts Due: April 2, 2010
   - Data Submittal: May 15, 2010
   - Workshop: June 26-27, 2010

Please note that the abstract requirement is only for a single page summary, with participant name(s), affiliation(s), corresponding author contact information (mailing address, phone number, and e-mail address), brief description of solver code(s), name of supplied grid(s) being used and/or brief description of other grid(s) being used, and whether the optional case 3 is being computed.

The Geometry, Test Cases, and Data Submittal Format have been finalized and are available at the workshop website: http://hiliftpw.larc.nasa.gov.

Several complete grid families are now available on the website for Configuration 1 and 8, including Structured Multiblock, Overset, and Unstructured Node-centered grids. Also soon to be available are a second set of Structured Multiblock and Unstructured Cell-Centered grids.

If you have further questions please consult the website or you may reply directly to this email.

Thank you for your interest.
