A notice to HiLiftPW-1 participants,

A problem has recently been discovered with one of the grid systems (OnetoOne-C series). Deviations have been found in the surface geometry, compared to the shape specified in the IGES files. This issue is being worked, but there is no estimated time for completion of the fixes. It is not known if or how these deviations might affect computed results. The grid systems affected are:

Str-OnetoOne-C-v1 and  
Unst-Hex-FromOnetoOne-C-v1
